Washington, DC 20554

Re: Arctic Slope Telephone Association Cooperative Inc. Notice of Network Changes, CC Docket No. 96-98, 47 C.F.R. §§ 51.325 – 51.335

Dear Ms. Dortch:

Pursuant to Sections 51.325 – 51.335 of the Federal Communications Commission's ("FCC" or "Commission") Rules, Arctic Slope Telephone Association Cooperative Inc. ("ASTAC"), by its attorney, hereby submits the attached Short Term Public Notice Under Rule 51.333(a). Specifically, ASTAC is providing notification of its planned replacement of certain copper distribution and loop facilities with fiber facilities in its Barrow and Point Hope Central Offices. Upon completion, ASTAC will provide services over its fiber optic network.

At these addresses, ASTAC serves approximately 1700 retail customers, most of whom purchase "plain old telephone service" ("POTS"). Following ASTAC's transition to fiber, ASTAC will continue to offer POTS over fiber and its customers will be offered the same regulated services at the same prices as they have today. ASTAC has notified the telephone exchange service providers that directly interconnect with ASTAC's incumbent local exchange carrier ("LEC") network.

ASTAC will work closely with its customers to address any particular needs as it moves forward. Please contact me should you require any additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "G. W. Whiteaker".

Gregory W. Whiteaker
*Counsel for Arctic Slope Telephone Association
Cooperative Inc.*

September 10, 2015

SHORT TERM PUBLIC NOTICE UNDER RULE 51.333(a)

Carrier: Arctic Slope Telephone Association Cooperative Inc., hereafter ASTAC, is headquartered at 4300 B Street, Suite 501, Anchorage, Alaska 99503.

Contact: For additional information concerning these network changes, please contact:

Jodi Forsland
Chief Services Officer
Arctic Slope Telephone Association Cooperative Inc.
4300 B Street, Suite 501
Anchorage, AK 99503
1-800-478-6409

Implementation Date: On or after December 10, 2015.

Planned Network Change(s) Will Occur at the Barrow and Point Hope Alaska Central Offices:

ASTAC Central Offices

Latitude 71.294
Longitude -156.784
Barrow, Alaska 99723
BRRWAKXA

Latitude 68.3484
Longitude -166.736
Point Hope, Alaska 99766
PNHPAKXA

Locations

Retirement of copper network facilities in the areas listed in Exhibit A. Note that where street addresses do not exist, as is often the case in remote regions, latitude and longitude information will be used.

Arctic Slope Telephone Association Cooperative, Inc.

4300 B Street, Suite 501, Anchorage, AK 99503

907-563-3989 • 1-800-478-6409 • f: 907-563-1932

Description of the Planned Network Change(s):

Subject to seasonal construction variance, ASTAC intends to overbuild its copper facilities with fiber in Barrow and Point Hope, Alaska starting in Quarter 2 of 2016 through Quarter 4 of 2016. For CLEC customers serving enterprise end users, a “fiber to the premise” design is planned.

This activity is planned to leverage a new middle mile undersea fiber landing at the coastal communities by Quintillion Networks as part of the larger Arctic Fiber Project. More information on the Quintillion project can be found at: <https://www.alcatel-lucent.com/press/2015/alcatel-lucent-and-quintillion-subsea-holdings-build-undersea-cable-system-connecting-six>.

ASTAC’s network upgrade to fiber, in conjunction with the Quintillion landings, will eliminate most of the latency that is present with the current satellite middle mile platform in communities where satellite is used (Barrow and Point Hope). It should make bandwidth more affordable for the cooperative, its members and your end users and increase available capacity dramatically. Each landing will initially be capable of providing 100 Gbps of capacity. All services you currently receive will be made available on the upgraded network at reasonably comparable rates, terms and conditions.

Additionally, ASTAC is voluntarily providing eight hours of stand-by battery back up to power the fiber optic line so that your end user will maintain the ability to call 911 in an extended power outage, similar to how copper facilities were line powered previously in an outage. The equipment we are installing as part of the network upgrade will also monitor the condition of the battery and when it degrades over time and needs replacement, we will contact you to see if you would like to purchase a replacement battery for the end user. While the FCC allows us to offer optional battery back-up for purchase with the deployment of fiber, we felt that you should get a chance to evaluate if this is something your end user desires, initially with the cooperative absorbing the cost of doing so. Your end user is under no obligation to purchase subsequent back up battery power.

Fiber to the premise will be delivered primarily using GPON (Gigabit-capable Passive Optical Network) on a single fiber to the customer premise NID (Network Interface Device). Non GPON services will be delivered by active Ethernet on a fiber pair and will be handled on a limited case by case basis. All data protocols to the NID are IP based, the data connection is a direct connect on an Ethernet port, POTS is delivered via SIP, and TDM is delivered via pseudowire Ethernet (PWE). Using 16:1 splitters in our markets with short

Arctic Slope Telephone Association Cooperative, Inc.

4300 B Street, Suite 501, Anchorage, AK 99503

907-563-3989 • 1-800-478-6409 • f: 907-563-1932

fiber distances, we will achieve a generous link loss budget insuring reliable links to every endpoint. Each PWE circuit is isolated by VLAN and given a private point to point routed network with a p-bit to prioritize traffic. Additionally each SIP delivered POTS line will be assigned a priority p-bit to insure call quality is not compromised if there is network congestion. Facility assignments will be managed as any other access equipment with the addition of VLAN and IP address tracking matched to the customer agreement number.

Description of reasonably foreseeable impact(s) of the planned change(s):

After the retirement of copper facilities, ASTAC may remove or cease maintaining the copper facilities. To the extent required by applicable agreements and federal law, ASTAC will offer to requesting carriers a 64Kbps voice grade channel over fiber loops that have been deployed where copper loops have been retired.

Thank you for your continued support and patience as we upgrade the network.

Sincerely,

A handwritten signature in black ink that reads "Stephen Merriam".

Stephen Merriam, CEO

ASTAC

Proudly Serving the North Slope Since 1980

CERTIFICATION OF SHORT TERM PUBLIC NOTICE UNDER RULE 51.333(a)

I, Stephen Merriam, do hereby certify that on September 10, 2015 (a minimum of five business days prior to filing), I caused the foregoing Arctic Slope Telephone Association Cooperative Inc. ("ASTAC") Short Term Public Notice Under Rule 51.333(a) to be served via U.S. Mail or email, at the other service providers' preference, upon each known provider of telephone exchange service that interconnects directly with ASTAC in the applicable area(s).

Attached are the names and email addresses of those providers who were served.

Stephen Merriam, CEO
ASTAC
Proudly Serving the North Slope Since 1980
